

Safety Summary

Fatty acid ester with tri-ethanolamine, quaternized

The document of the safety summary provides the safety information of the chemical substance to the general public. The safety summary is NOT intended to be an alternative document of Safety Data Sheet which is described from the recommendable detailed safety measures for each use. The safety summary is NOT intended to be an alternate document of the instructions for use nor the warning of consumer products including this substance. The contents of this summary are based on the laws, documents, information, and data available at present, without any warranty.

1. Chemical Identity

Category Name	Fatty acid ester with tri-ethanolamine, quaternized
Substance Name	Fatty acid (C 6-24) ester of [halo (Cl or Br)methosulfate or ethosulfate of tri (polyoxyalkylene) alkyl (C1-6) ammonium]
CAS Number	91995-81-2、 93334-15-7、 91032-11-0 94095-35-9、 85408-12-4、 157905-74-3

2. Product Uses and Benefits

Fatty acid ester with tri-ethanolamine, quaternized (TEAQ) is a cationic surfactant. Fabric softener containing TEAQ is widely used as consumer products.

There is no information on its industrial use.

3. Physical/Chemical Properties

TEAQ has 19 homologues, when the numbers of carbon of the alkyl group are C16, C18 and C18-unsaturate. As the representative structure, the physical and chemical properties of di-ester type TEAQ with the numbers of carbon of the alkyl group of C16, C18 and C18-unsaturate, were calculated using computer software EPI suite 4.11 of the U. S. Environmental Protection Agency as shown below.

Physical and chemical properties of TEAQ (di-ester type C16, C18, C18-unsaturate)

Property	Carbon numbers of the alkyl group		
	C16	C18	C18-unsaturate
Molecular weight	642.07	698.18	694.15
Boiling point (°C)	794.7	841.1	848.2
Melting point (°C)	349.8	349.8	349.88
Vapor pressure (Pa) 25°C	1.97×10^{-21}	5.68×10^{-23}	3.28×10^{-23}
Water solubility (mg/L)	1.69×10^{-08}	1.51×10^{-10}	3.74×10^{-10}
Octanol/water partition coefficient (Log Kow)	11.3	13.3	12.8
Acid dissociation constant (pKa)	7.29	8.33	8.33
Soil adsorption coefficient (Log Koc)	642.07	698.18	694.15

4. Human Health Safety Assessment

Consumer: The exposure to TEAQ is at safe levels.

Worker: The repeated exposure of TEAQ does not cause any toxic effects

Effect Assessment	Result
Acute Toxicity oral/ dermal	No acute toxicity after oral/ dermal exposure in practical use The substance does not cause damage to any organs following single exposure
Irritation skin/ eye	Undiluted substance causes mild to moderate skin irritation Causes serious eye irritation
Sensitization	Based on the available data, unlikely to cause allergic skin reaction
Toxicity after repeated exposure	Unlikely to cause any toxic effects through prolonged or repeated oral exposure in practical use
Mutagenicity	Based on the available data, unlikely to cause genetic defects
Carcinogenicity	Based on the available data, unlikely to cause cancer
Toxicity for reproduction	Based on the available data, unlikely to be damaging to fertility or the unborn child

5. Environmental Safety Assessment

The test results with fish, aquatic invertebrates and algae suggest that TEAQ could cause toxicity for aquatic organisms. However, TEAQ is unlikely to persist in the environment because of the readily biodegradation. TEAQ does not bioaccumulate in the food chain.

Effect Assessment	Result
Aquatic Toxicity	Based on the available data, likely to cause toxicity for aquatic organisms
Biodegradation	Readily biodegradable
PBT/ vPvB conclusion*	Not persistent in the environment, not bioaccumulating in organisms and not toxic nor very persistent and very bioaccumulating

*PBT=Persistent, Bioaccumulative and Toxic
vPvB=Very Persistent and Very Bioaccumulative

6. Exposure

- **Consumer**

The consumer will come into contact with the substance in use of fabric softener, but the concentration of TEAQ in use is below the level which would give rise harmful effects of concern. When it's used as the recommended use, consumer should always read product information before use and follow the label/ use instructions.

- **Worker**

The exposure can occur either in TEAQ manufacturing facilities or in the various industrial facilities when TEAQ is used. Those workers in industrial operations during maintenance, sampling, testing, or other procedures could be exposed with TEAQ. Only qualified and trained workers handle the undiluted substance. The manufacturing facilities offers thorough training program for employees and appropriate work processes, as well as safety equipment (goggles and gloves) in place to prevent an unnecessary exposure. Safety showers and eye-wash stations are accessible nearby. Workers are required to be trained in accordance with the safety measures in the Safety Data Sheet.

- **Environment**

Since this substance is used as consumer products, it is discharged to waste water treatment plants from consumer households. However, the substance is readily biodegradable, so that it is removed efficiently in waste water treatment plants. The substance is biologically degraded in the surface water and is rapidly removed even if it is remained slightly in the waste water. Hence, the chronic exposure to aquatic organisms of the substance is unlikely to occur. Furthermore, the substance dose not accumulate in the food chain, so that there is no concern of human exposure through environmental pathway.

7. Risk management recommendations

When you use the substance, make sure to be measured the adequate ventilation. Always use appropriate chemical-resistant gloves to protect your hands and skin and always wear eye protection equipment. Do not eat, drink or smoke where the substance is handled,

processed or stored. Wash hands and skin after contact with the substance. When the substance attaches to skin (or hair), take off the contaminated clothes. Wash with a large amounts of water and soap. When it causes your skin irritation, consult doctor (medical diagnosis/therapy). If the substance gets into your eyes, rinse your eyes thoroughly for several minutes. If you wear contact lens, and you can take it off easily, take it off and continue to rinse your eyes. When eye irritation persists, consult doctor (medical diagnosis/therapy).

Waste water containing the substance must be passed the waste water treatment plants in order to remove the substance. No specific measures are needed, because it is not expected to be released into the air.

8. Regulatory Information/Classification and Labeling

Under GHS classification chemical substances are classified in hazards for physical properties, human health and environment. The hazard information for industrial products are transmitted via specific labels and Safety Data Sheet. GHS offers the standardization for hazard communication. The subjects who could be assumed to be exposed to the substance, workers, consumers, transport workers, and emergency responders, can better understand the hazards of the chemicals in use through the transmission.

Labeling according to UN GHS

UN GHS is the basis for country specific GHS labeling.
TEAQ may be assigned to following GHS classification.

Classification and labelling information

Skin Irrit. 2
Eye Dam. 2A
Aquatic Acute 2

Hazard Statements:

H315: Causes skin irritation
H319: Causes serious eye irritation
H401: Toxic to aquatic life

Signal Word

Warning

The laws of manufacturing, sale, transport, use and disposal are different among countries or areas. Details are referred to Safety Data Sheet provided by the supplier.

9. Conclusion

Though TEAQ is suggested to cause toxicity for aquatic organisms, the risk to environment organisms is negligible due to the rapid degradation of TEAQ. In the PBT/vPvB assessments for TEAQ, the substance is not applicable to PBT/vPvB. Contact with the undiluted TEAQ may cause irritation to the skin and serious irritation to the eyes. When handling the substance, workers should follow the standard safety measures and refer to the Safety Data Sheet. Consumers will usually not come into contact with the substance bulk and the substance is used diluted products, therefore, it is considered that TEAQ gives rise no hazardous effects to human health.

10. Contact

For further information on this substance or Safety Summaries in general, please contact us.

11. Glossary

Acute Toxicity	Adverse effects that result from a single exposure
Biodegradation	Biological degradation of a substance in environments
Bioaccumulation	Accumulation of substances in environments
Carcinogenicity	Action influence to cause a cancer
Toxicity after repeated exposure	Adverse effects that result from repeated exposure
GHS	Globally Harmonized System of Classification and Labelling of Chemicals
Hazard	Hazardous property for human health or environments
Mutagenicity	Effects to induce gene mutations
Toxicity for reproduction	Adverse effects for teratogenicity, embryotoxicity, and reproductivity
Sensitization	Inducibility of allergy

12. Date of Issue
