United States Patent Granted

April 14, 2020

Kao Specialties Americas is pleased to announce that Dr. Christopher Johnson (R&D Manager, Imaging Materials) and Dr. Norihiro Fukuri (formerly Assistant Manager, Imaging Materials) have been granted United States Patent US 10619005 B2 entitled “Method for Producing Binder Resin Composition”.

This new resin composition can be used by our imaging customers to make toner that improves fuser life, lowers fusing energy, and reduces volatile irritants produced during toner manufacturing.

Kao has built a strong intellectual property position on toner binder technology over the past 35 years and this new patent continues this long history of innovation.
